The Filter Trap A. L. Lorentz 2016-04-08 An alien intelligence initiates first contact with the Earth, but it may be the last thing we ever hear. As Cal-Tech astrophysicist Allan Sands prepares to spend another perfect Pasadena Christmas with his wife and children, he realizes something isn't right. The television doesn't work, mobile networks are down, and the internet slows to a halt. When Allan notices celestial objects are absent from the early-morning sky he knows this is no power outage or terrorist attack. He heads to nearby Mt. Wilson Observatory, where he discovers the cause of the strange Event is worse than he could have imagined. From his perch above Los Angeles Allan can see the oncoming tsunami that will devastate the coastline and kill millions, foreshadowing disasters soon to befall the entire planet. And he may be the only person who knows why. 2,500 miles away at Hickam Air Force Base in Honolulu Lieutenant Lee Green and her raptor squad are the only pilots left to escort the president to safety as the world scrambles to save lives and comprehend what is happening.

Their next mission: Find Allan Sands and the other scientists on the president's secret First Contact list. Will the world be ready to hear what the scientists conclude about the mysterious so-called Event that turned day to night? When a strange object is spotted heading for the Earth the world wonders if the aliens are coming in peace to help us survive or to finish what they started. Equal parts high concept and high action, the Filter Trap explains Fermi's Paradox in a way that contrasts the hidden terrors of the universe with the ever-present hope in the human heart.

After Kurukshetra Mah??vet? Deb? 2005 With the ancient epic Mahabharat as her source, and the battle of Kurukshetra as a central motif, Mahasweta Devi weaves three stories in which we visit unexpected alleys and by-lanes of the traditional epic saga, and look at events from the eyes of women marginalized, dispossessed, dalit. Their eyes condemn the wanton waste and inhumanity of war. This Kurukshetra is not the legendary Dharmayuddha of the popular imagination but rather a cold-blooded power game sacrificing countless human lives. How do the women s quarters of the palace, a colourless place of shadowy widowhood, appear to five peasant women whose lives are no less shattered by the Kurukshetra massacre, but who are used to dealing with trauma in a more robust manner? How does their outlook on life and survival influence the young pregnant princess who is abruptly plunged into the half-life of uppercaste widowhood? How does a lower caste serving woman, who was brought in to service king Dhritarashtra when his queen was with child, view her half-royal offspring and his decision to perform the last rites for a father who never acknowledged him as a son? How does an ageing Kunti, living out her last years in the forest, come to terms with her guilt over her unacknowledged son, Karna? And, having finally voiced her shame aloud, how then does she face up to a crime she has not even remembered: the murder of a family of nishad forest dwellers? These tales, brewed in the imagination of a master story-teller, make us look at the Mahabharata with new eyes, insisting as they do on the inclusion, within the master narrative, of the fates and viewpoints of those previously unrepresented therein: women and the underclass. MAHASWETA DEVI is one of India s foremost writers. Her powerful, satiric fiction has won her recognition in the form of the Sahitya Akademi (1979), Jnanpith (1996) and Ramon Magsaysay (1996) awards, the title of Officier del Ordre Des Arts Et Des Lettres (2003) and the Nonino Prize (2005), amongst several other literary honours. She was also awarded the Padmasree in 1986, for her activist work amongst dispossessed

tribal communities. ANJUM KATYAL is as an editor who has also translated several plays and short stories. Houses of Maine Elliott + Elliott Architecture 2013-05-21 "There have been many influences for us over the years but the defining factor in our firm's work is that we practice architecture in Maine, amidst extraordinary and ordinary beauty." Although it has become something of a cliché for architects to say they pay close attention to a building's site and surroundings, for Elliott + Elliott Architecture, residing, working, and building along Maine's rugged coast has translated not only into refreshing architectural forms whose roots in tradition are clear, but also into collaborative processes with local builders and artisans, in the spirit of the shipbuilders and craftsmen of the state's history. Featuring six of their most emblematic residential projects, Houses of Maine demonstrates that, in the right hands, the rough-around-the-edges individualism and often harsh natural environment for which this coast is known allow for a balanced, serene, and vernacular architecture whose links with the past create nothing less than a confidently optimistic preview of the region's architectural future.

Linear Programming Vasek Chvatal 1983-09-15 "This comprehensive treatment of the fundamental ideas and principles of linear programming covers basic theory, selected applications, network flow problems, and advanced techniques. Using specific examples to illuminate practical and theoretical aspects of the subject, the author clearly reveals the structures of fully detailed proofs. The presentation is geared toward modern efficient implementations of the simplex method and appropriate data structures for network flow problems. Completely self-contained, it develops even elementary facts on linear equations and matrices from the beginning."--Back cover.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with

lessons that go down easy. You'll be laughing and learning at the same time.

The Mommy Psychologist Heather Harrison 2012-10-01 Just like A Girlfriend's Guide to Pregnancy is the must-have book for any pregnant woman, The Mommy Psychologist is the must-have book for any new mother. If you are a mother, a mother-to-be, or thinking about becoming a mother then you must read this book. Grab a cup of coffee or a glass of wine and get ready to learn the real deal on motherhood. The stuff none of the other parenting books tell you. You might be surprised to learn that after natural childbirth, your vagina will look like Mike Tyson went nine rounds on it or that breastfeeding on the toilet cures constipation. The Mommy Psychologist is not another prescriptive, how-to guide on parenting. The last thing we need is another parenting book lining the shelves promising parental success if we apply the correct mathematical formula to our babies. It's narrated by a Child Psychologist who thought she had all the answers to parenting until she became one herself. She exposes her faults unapologetically in an account that is both hilarious and heartbreaking. She makes sense of the emotional extremes of motherhood and shows how seemingly contradictory emotions about motherhood can co-exist. Each chapter tackles a specific parenting topic ranging from dealing with infant sleep problems to dispelling some of the common myths associated with autism. The Mommy Psychologist doesn't give mothers the illusion that if they apply certain steps to a problem they will get a specific result. Instead, mothers are encouraged to view parenting through the lens of self empowerment and suggestions are provided to help them use the information they have at their disposal, but mostly, to feel better about themselves. Mothers are urged to do what feels right for them in any given parenting situation. It is written with a voice that marries education with the practical experience only gained through the act of being a mother.

Creating Effective Learning Environments Ingrid Crowther 2010-12-21 Creating Effective Learning Environments takes curriculum development to another level: it fills the gap between theory and practice. This text helps readers see the curriculum from a child's perspective and understand how that perspective is linked to learning and theory. It is the author's view that the centre of any curriculum is the child; this text begins not with general theories or applications that are suitable for many, but with each individual child. The theory and methodology of this text are integrated around the actual experiences of children, presented in a logical flow, and embracing

current philosophies about integration, play, bias, and learning practices.

Plastic-Free Beth Terry 2015-04-21 "Tells a story that could inspire everyday behavior change for all of us. Small steps, leading to one big milestone: a planet free of plastic pollution." —Daniella Dimitrova Russo, CEO and founder of Think Beyond Plastic™ Like many people, Beth Terry didn't think an individual could have much impact on the environment. But while laid up after surgery, she read an article about the staggering amount of plastic polluting the oceans, and decided then and there to kick her plastic habit. In Plastic-Free, she shows you how you can too, providing personal anecdotes, stats about the environmental and health problems related to plastic, and individual solutions and tips on how to limit your plastic footprint. Presenting both beginner and advanced steps, Terry includes handy checklists and tables for easy reference, ways to get involved in larger community actions, and profiles of individuals—Plastic-Free Heroes—who have gone beyond personal solutions to create change on a larger scale. Fully updated, Plastic-Free also includes sections on letting go of eco-guilt, strategies for coping with overwhelming problems, and ways to relate to other people who aren't as far along on

the plastic-free path. Both a practical guide and the story of a personal journey from helplessness to empowerment, Plastic-Free is a must-read for those concerned about the ongoing health and happiness of themselves, their children, and the planet. “This is the tool that we’ve all been waiting for to ease the transition to going plastic-free. Time to wake up. Peace.” —Rosanna Arquette, actor, Plastic Pollution Coalition member
