Perhaps the Stars Ada Palmer 2021-11-02 From the 2017 John W. Campbell Award Winner for Best Writer, Ada Palmer's Perhaps the Stars is the final book of the Hugo Award-shortlisted Terra Ignota series. World Peace turns into global civil war. In the future, the leaders of Hive nations—nations without fixed location—clandestinely committed nefarious deeds in order to maintain an outward semblance of utopian stability. But the facade could only last so long. The comforts of effortless global travel and worldwide abundance may have tempered humanity's darkest inclinations, but conflict remains deeply rooted in the human psyche. All it needed was a catalyst, in form of special little boy to ignite half a millennium of repressed chaos. Now, war spreads throughout the globe, splintering old alliances and awakening sleeping enmities. All transportation systems are in ruins, causing the tyranny of distance to fracture a long-united Earth and threaten to obliterate everything the Hive system built. With the arch-criminal Mycroft nowhere to be found, his successor, Ninth Anonymous, must not only chronicle the discord of war, but attempt to restore order in a world spiraling closer to irreparable ruin. The fate of a broken society hangs in the balance. Is the key to salvation to remain Earth-bound or, perhaps, to start anew throughout the far reaches of the stars? At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is

brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

The Most Dangerous Game Richard Connell 2021-01-01 ?? The Most Dangerous Game by Richard Connell ?? The Most Dangerous Game, also published as *The Hounds of Zaroff*, is a short story by Richard Connell first published in *Collier's* magazine on January 19, 1924. It features a big-game hunter from New York who falls off a yacht and swims to an isolated island in the Caribbean where he is hunted by a Cossack aristocrat. The story is an adaptation of the big-game hunting safaris in Africa and South America that were fashionable among wealthy Americans in the 1920s. ?? The Most Dangerous Game by Richard Connell ?? Big-game hunter Sanger Rainsford and his friend, Whitney, are traveling to the Amazon rainforest for a jaguar hunt. After a discussion about how they are "the hunters" instead of "the hunted," Whitney goes to bed and Rainsford hears gunshots. He climbs onto the yacht's rail and accidentally falls overboard, swimming to Ship-Trap Island, which is notorious for shipwrecks. On the island, he finds a palatial chateau inhabited by two Cossacks: the owner, General Zaroff, and his gigantic deaf-mute servant, Ivan. ?? The Most Dangerous Game by Richard Connell ?? Zaroff, another big-game hunter, knows of Rainsford from his published account of hunting snow leopards in Tibet. Over dinner, the middle-aged Zaroff explains that although he has been hunting animals since he was a boy, he has decided that killing big-game has become boring for him, so after escaping the Russian Revolution he moved to Ship-Trap Island and set it up to trick ships into wrecking themselves on the jagged rocks that surround it. He takes the survivors captive and hunts them for sport, giving them food, clothing, a knife, and a three-hour head start, and using only a small-caliber pistol for himself. Any captives who can elude Zaroff, Ivan, and a pack of hunting dogs for three days are set free. He reveals that he has won every hunt to date. Captives are offered a choice between being hunted or turned over to Ivan, who once served as official knouter for The Great White Czar. Rainsford denounces the hunt as barbarism, but Zaroff replies by claiming that

"life is for the strong." Realizing he has no way out, Rainsford reluctantly agrees to be hunted. During his head start, Rainsford lays an intricate trail in the forest and then climbs a tree. Zaroff finds him easily, but decides to play with him as a cat would with a mouse, standing underneath the tree Rainsford is hiding in, smoking a cigarette, and then abruptly departing. ?? The Most Dangerous Game by Richard Connell ?? After the failed attempt at eluding Zaroff, Rainsford builds a Malay man-catcher, a weighted log attached to a trigger. This contraption injures Zaroff's shoulder, causing him to return home for the night, but he shouts his respect for the trap before departing. The next day Rainsford creates a Burmese tiger pit, which kills one of Zaroff's hounds. He sacrifices his knife and ties it to a sapling to make another trap, which kills Ivan when he stumbles into it. To escape Zaroff and his approaching hounds, Rainsford dives off a cliff into the sea; Zaroff, disappointed at Rainsford's apparent suicide, returns home. Zaroff smokes a pipe by his fireplace, but two issues keep him from the peace of mind: the difficulty of replacing Ivan and the uncertainty of whether Rainsford perished in his dive.

The Art of Asking Amanda Palmer 2014-11-11 FOREWORD BY BRENE BROWN and POSTSCRIPT FROM BRAIN PICKINGS CREATOR MARIA POPOVA Rock star, crowdfunding pioneer, and TED speaker Amanda Palmer knows all about asking. Performing as a living statue in a wedding dress, she wordlessly asked thousands of passersby for their dollars. When she became a singer, songwriter, and musician, she was not afraid to ask her audience to support her as she surfed the crowd (and slept on their couches while touring). And when she left her record label to strike out on her own, she asked her fans to support her in making an album, leading to the world's most successful music Kickstarter. Even while Amanda is both celebrated and attacked for her fearlessness in asking for help, she finds that there are important things she cannot ask for--as a musician, as a friend, and as a wife. She learns that she isn't alone in this, that so many people are afraid to ask for help, and it paralyzes their lives and relationships. In this groundbreaking book, she explores these barriers in her own life and in the lives of those around her, and discovers the emotional, philosophical, and practical aspects of THE ART OF ASKING. Part manifesto, part revelation, this is the story of an artist struggling with the new rules of exchange in the twenty-first century, both on and off the Internet. THE ART OF

ASKING will inspire readers to rethink their own ideas about asking, giving, art, and love.

Barron's AP Psychology with CD-ROM Robert McEntarffer 2010-02-01 This updated manual presents one diagnostic test and two full-length practice tests that reflect the actual AP Psychology Exam in length, subject matter, and difficulty. How Tobacco Smoke Causes Disease 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

AP Achiever (Advanced Placement* Exam Preparation Guide) for European History (College Test Prep) Chris Freiler 2008-01-22 Designed to help Advanced Placement students succeed in their studies and achieve a '5' on the AP Exam, AP Achiever for European History provides: A thorough explanation of course expectations, exam parameters, preparation suggestions, as well as comprehensive tips on writing essays for the document-based and free-response section of the Exam, all to help your students maximize studies and time. Each chapter includes a thorough content review and "Heads Up!" and "Sidebar" sections designed to connect important topics, clarify common misunderstandings, or add important information to assist in preparation for the exam. This book covers standard political, diplomatic, economic, and intellectual trends, but also makes a special effort to incorporate essential social and cultural history that is increasingly emphasized on the exam. Multiple-choice, document-based questions and free-response questions with detailed answers are included for each chapter. Two complete timed practice exams with detailed answers and sample essays help students gear up for your final test day. AP Achiever for European History may be used independently or in conjunction with any European History text. For the most benefit use in conjunction with McGraw-Hill's leading text, History of the Modern World, 10th Edition, by Palmer.

Sleep Disorders and Sleep Deprivation Institute of Medicine 2006-10-13 Clinical practice related to sleep problems and sleep disorders has been expanding rapidly in the last few years, but scientific research is not keeping pace. Sleep apnea, insomnia, and restless legs syndrome are three examples of very common disorders for which we have little biological information. This new book cuts across a variety of medical disciplines such as neurology, pulmonology, pediatrics, internal medicine, psychiatry, psychology, otolaryngology, and nursing, as well as other medical practices with an interest in the management of sleep pathology. This area of research is not limited to very young and old patientsâ€"sleep disorders reach across all ages and ethnicities. Sleep Disorders and Sleep Deprivation presents a structured analysis that explores the following: Improving awareness among the general public and health care professionals. Increasing investment in interdisciplinary somnology and sleep medicine research training and mentoring activities. Validating and developing new and existing technologies for diagnosis and treatment. This book will be of interest to those looking to learn more about the enormous public health burden of sleep disorders and sleep deprivation and the strikingly limited capacity of the health care enterprise to identify and treat the majority of individuals suffering from sleep problems.

The Children of Men P. D. James 2010-10-20 Told with P. D. James's trademark suspense, insightful characterization, and riveting storytelling, The Children of Men is a story of a world with no children and no future. The human race has become infertile, and the last generation to be born is now adult. Civilization itself is crumbling as suicide and despair become commonplace. Oxford historian Theodore Faron, apathetic toward a future without a future, spends most of his time reminiscing. Then he is approached by Julian, a bright, attractive woman who wants him to help get her an audience with his cousin, the powerful Warden of England. She and her band of unlikely revolutionaries may just awaken his desire to live . . . and they may also hold the key to survival for the human race.

European History IntroBooks 2018-02-19 Europe's relationship with culture, even at the most basic level, dates back to at least 20,000 BCE. The Venus of Willendorf and the cave paintings of Altamira and Lascaux are examples of the presence of civilization in Europe thousands of years ago. By 5000 BC, evidence proves that areas of Europe had begun to show hierarchical societies and a firm agricultural background had been formed by many of these societies. While a clear division of boundaries did not exist back then, the history of Europe if we go back to thousands of years ago, during the Neolithic age, can be mainly traced through their settlements and tools.

Pain Management and the Opioid Epidemic National Academies of Sciences, Engineering, and Medicine 2017-09-28 Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

Traditions & Encounters: A Global Perspective on the Past Heather Streets Salter 2014-10-07 Traditions & Encounters offers an inclusive vision of the global past—one that is meaningful and appropriate for the interdependent world of contemporary times. Given the diversity of human societies, gathering and organizing the sheer mass of information in a meaningful way is a daunting challenge for any world history survey course. The seven-part chronological organization enables students to understand the development of the world through time, while also exploring broader, big-picture thematic issues in world history. Through new and revised chapter-level and part-level features, the hallmark twin themes of traditions and encounters emerge in greater clarity than ever before in this sixth edition. As a result, students have resources that enable them to move beyond the facts of history and examine the past critically, analyze causes and effects, and recognize similarities and differences across world regions and time periods. By digging deeper into the implications of world history's stories—not just the who, the what, and the where, but also the why and the how—students can make sense of the human past. Connect is the only integrated learning system that empowers

students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

Pre-Incident Indicators of Terrorist Incidents Brent L. Smith 2011-01 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Disease Control Priorities, Third Edition (Volume 6) Prabhat Jha 2017-12-04 Infectious diseases are the leading cause of death globally, particularly among children and young adults. The spread of new pathogens and the threat of antimicrobial resistance pose particular challenges in combating these diseases. Major Infectious Diseases identifies feasible, cost-effective packages of interventions and strategies across delivery platforms to prevent and treat HIV/AIDS, other sexually transmitted infections, tuberculosis, malaria, adult febrile illness, viral hepatitis, and neglected tropical diseases. The volume emphasizes the need to effectively address emerging antimicrobial resistance, strengthen health systems, and increase access to care. The attainable goals are to reduce incidence, develop innovative approaches, and optimize existing tools in resource-constrained settings.

New Handbook for a Post-Roe America Robin Marty 2021-03-30 A completely new edition--with a new introduction by Amanda Palmer--of Robin Marty's best-selling manual on what to do if/when Roe v. Wade is overturned. The New Handbook for a Post-Roe America is a comprehensive and user-friendly manual for understanding and preparing for the looming changes to reproductive rights law, and getting the health care you need. Activist and writer Robin Marty guides readers through various worst-case scenarios of a post-Roe America, and offers ways to fight back, including: how to acquire financial support, how to use existing networks and create new ones, and how to, when required, work outside existing legal systems. She details how to plan for your own emergencies, how to start organizing now, what to know about self-managed abortion care with pills and/or herbs, and how to avoid surveillance. The only guidebook of its kind, The New Handbook for a Post-Roe America includes new chapters that cover the needs and tools available for pregnant people across the country. This second edition features extensively updated information on abortion legality and access in the United States, and approximately one hundred pages of new content, covering such topics as independent alternatives to Planned Parenthood, "auntie networks," taxpayer-funded abortions, and using social media wisely in the

age of surveillance.

An Introduction to Language and Linguistics Ralph Fasold 2006-03-06 This accessible textbook is the only introduction to linguistics in which each chapter is written by an expert who teaches courses on that topic, ensuring balanced and uniformly excellent coverage of the full range of modern linguistics. Assuming no prior knowledge the text offers a clear introduction to the traditional topics of structural linguistics (theories of sound, form, meaning, and language change), and in addition provides full coverage of contextual linguistics, including separate chapters on discourse, dialect variation, language and culture, and the politics of language. There are also up-to-date separate chapters on language and the brain, computational linguistics, writing, child language acquisition, and second-language learning. The breadth of the textbook makes it ideal for introductory courses on language and linguistics offered by departments of English, sociology, anthropology, and communications, as well as by linguistics departments.
Western Civilization Jackson J. Spielvogel 2005 Prepared by James T. Advanced Placement World History: Modern Editors 2019-09

Dictionary of Indo-European Concepts and Society Émile Benveniste 2016 Since its publication in 1969, Émile Benveniste's *Vocabulaire*--here in a new translation as the *Dictionary of Indo-European Concepts and Society*--has been the classic reference for tracing the institutional and conceptual genealogy of the sociocultural worlds of gifts, contracts, sacrifice, hospitality, authority, freedom, ancient economy, and kinship. A comprehensive and comparative history of words with analyses of their underlying neglected genealogies and structures of signification--and this via a masterful journey through Germanic, Romance, Indo-Iranian, Latin, and Greek languages--Benveniste's dictionary is a must-read for anthropologists, linguists, literary theorists, classicists, and philosophers alike. This book has famously inspired a wealth of thinkers, including Roland Barthes, Claude Lévi-Strauss, Pierre Bourdieu, Jacques Derrida, Umberto Eco, Giorgio Agamben, François Jullien, and many others. In this new volume, Benveniste's masterpiece on the study of language and society finds new life for a new generation of scholars. As political fictions continue to separate and reify differences between European, Middle Eastern, and South Asian societies, Benveniste reminds us just how historically deep their interconnections are and that understanding the way our institutions are evoked through the words that describe them is more necessary than ever.
